ABOUT ME

Passionate and self-motivated undergraduate with a builder mindset and a strong commitment to creating technology that solves real-world business challenges. Thrives on analyzing user pain points and transforming them into practical, scalable, and consumer-centric software solutions. Recognized for strong analytical skills, excellent communication, and a continuous learning attitude. Eager to collaborate with industry partners to build thoughtful software that optimizes daily operations and enhances user experiences.

EDUCATION

University Of Moratuwa — **Katubedda , Sri Lanka**

- Bachelor of Science Honours in Information Technologyand Management — SGPA: 3.75 — *2025 - 2029*

Swarnapali Balika National School — **Anuradhapura , Sri Lanka**

- GCEA/L2024(FirstAttempt) - Commerce — *2010 - 2024*

TECHNICAL SKILLS

- **ProgrammingLanguages:** C, Java, PHP, TypeScript, Python
- **Web and Mobile Development:** React, NextJS, React Native, Spring Boot
- **Databases and ORMs:** MySQL, PostgreSQL, Firebase
- **DevOps and Cloud:** Git, Github
- **Tools:** Postman, Figma, Canva, MySQL Workbench

KEY PROJECTS

- **Portfolio website**
  Individual Project

  Designed and built a responsive portfolio website using HTML, CSS, and JavaScript to showcase software projects and technical expertise. Applied modern UI/UX design patterns, ensuring full mobile optimization, high performance, and an engaging, seamless user experience.

  [**View Github** 🔗]

- **E-commerce site**
  Individual Project

  Developed a multi-page, pixel-perfect digital retail concept web application modeled after a global storefront using HTML5, CSS3, and Bootstrap 5. Engineered responsive grids and flexible multi-device layouts for complex product catalog structures, while seamlessly managing core front-end interactions and custom component modules, such as a native JavaScript compliance cookie management system.

  [**ViewGithub** 🔗]

- **Weather Monitoring and Prediction System**
  First Year Microcontroller Based IOT Project (Group)

  This interactive dashboard serves as the responsive frontend for an IoT weather station project, powered by Firebase for 30-second live data syncs. It displays key environmental metrics—temperature, humidity, pressure, rain, and light—using Chart.js for smooth, toggleable line-graph visualizations. Beyond basic tracking, the interface computes secondary indices, forecasts weather trends.

ACHIEVEMENTS AND AWARDS

- **Participant - IEEE Road to Legacy, organized by the University of Sri Jayewardenepura**
  Explored Software Engineering, Artificial Intelligence & Cybersecurity, Game Development, Project Management, and industry trends through industry experts.

CERTIFICATIONS

- **Python for beginners (University of Moratuwa) - Credential ID: 3W1qAlgG9x View Credential**
- **Agile Project Management (University of Moratuwa) -Credential ID: ZH8YuuxD3w View Credential**
- **Understanding Data Science (DataCamp) - View Credential**
- **Introduction to SQL (DataCamp) - View Credential**
- **Intermediate SQL (DataCamp) - View Credential**

VOLUNTEERING EXPERIENCE

- **FIT FUTURE CAREERS (2026) - Univesity of Moratuwa (Coordinator)**
- **Blogger - Check my Medium**
